SHORT COURSE DESCRIPTION

Dealing with a conflict, regardless of its form or situation, is often painful. But conflicts are facts of life, and it is absolutely necessary for all of us to learn how to deal with them. This course offers a multidisciplinary perspective on various forms of conflicts (e.g. inter-personal conflicts such as the problems with in-laws, inter-group conflicts such as political discourse, and international conflicts such as territorial disputes and international trade). Based on advances in philosophy, psychology, literature, history, management, economics, political science, and other disciplines, we try to analyze origins and nature of conflicts and the role of rationality and emotion in our decision-making and behavior in choosing how to avoid, manage, and resolve the conflicts. As the choice critically depends on the personality of the actors (individuals or groups), we also try to examine the relationship between the personality and the choice of action.

In addition to the lectures, readings and discussions, the course will have several group exercises or presentations: one in inter-personal conflicts, another on inter-group conflicts, and another on international conflicts. Each presentation will cover the nature of the conflict, personalities of the principal actors, the potential alternatives to deal with the conflict (avoidance, management, or resolution). The purposes of group presentations are: 1) to be able to frame the conflict; 2) to understand the nature of the conflict; 3) to understand the objectives, rationality and emotion of the main actors; 4) and to devise a mechanism for a constructive solution. Hopefully, this course would enlighten students for improved personal and group collaborations in the age of conflict-ridden world.

READING MATERIALS

All reading material is listed for the date of the class. They will be available in digital form at the beginning of the class. Items with (*) are required, and others are recommended and for reference. Students are expected to read the required readings before the scheduled class, and should be prepared to engage in the discussion of the topic.

COURSE REQUIREMENTS AND GRADING

All ISS classes are pass/fail based on the student academic achievement evaluated by grades on a scale of 100 points (grade of 60 or above is Pass). SKKU regulations require students to attend at least 80% of all classes in order to receive a passing grade. Highest standards on academic conduct are expected, and any students who displayed academic misconduct (e.g. cheating, plagiarism, fraudulent attendance representation, and so on) will be strictly dealt with. Students show up 15 minutes after the class has started or leave 15 minutes before the class adjourns will be considered “tardy”, and two “tardy” will be counted for one absence.

Course grades will be determined based on the following four activities with respective weights:
1. Presentations  60%
2. Final Exam  40%

The topics and formats of presentations will be explained and assigned at the first class meeting. The format of the final exam will be take-home essay questions.
