

# Financial Markets and Institutions

Dr. Mingzhu Wang, King's College London

## SHORT COURSE DESCRIPTION

This module examines the nature of financial markets and the role of financial intermediaries, such as banks, mutual funds, insurance companies and pension funds. Among the issues analyzed are the nature of market efficiency, the extent to which asset prices reflect rational decisions as compared to psychological or speculative factors, the comparative merits of market-based and institution-based finance, and the question of financial regulation. The module will examine both theoretical models and the practical examples of financial markets and institutions.

## READING MATERIALS

The lectures provide the core content of the course, introducing key theories, practices and research findings. The information is supplemented by relevant readings from the below textbook:

Mishkin, F. S. and Eakins, S. G. (2015) *Financial Markets and Institutions*, Global Edition. (Other versions of this book are also find for learning this course. So below images are just examples.)

## COURSE REQUIREMENTS AND GRADING

This course will be taught through a combination of lectures and discussions allowing for an intensive study of practical problems related to the operation of financial markets and decision making within financial intermediaries and regulators. Students' performance will be assessed as below by a combination of attendance, group project presentation, and final exam.

Grading:

Attendance	30%
Group Project Presentation	30%
Final Exam	40%

Assessment criteria:

*Attendance:* students will get one point for attending each session. Students are required to

attend at least 80% of all lectures and workshops according to SKKU regulations.

*Group Project Presentations:* students will be allocated into groups of 4-5 students and assigned with project topics focusing on key issues of debates within the analysis of financial markets and institutions. Each group is required to give a presentation of about 20-25 minutes on the assigned topic. The group project presentation will be assessed according to students' understanding to the topic, clarity in presentation and appropriate use of references.

*Final Exam:* in the last session of the course, student will take the final exam that covers all the learning materials taught in the course.
